

INDEX OF VOLUME 52

REVIEWS

- Ahmed S., Wan Azizan W.A.S., Nazri F.R., Md Hatta M.A.: Harnessing CRISPR/Cas9 system to engineer disease resistance in solanaceous crops: Current progress and future prospects 1
- Priyadharsini R, Rajadurai K R, Beaulah A, Madhan Mohan M, Venkatesan K, Rajesh S: A review on crop improvement strategies and breeding methods in ornamental annuals 15
- Zelený L., Stryhalová G., Blažek J.: Sweet cherry world research overview 2018–2020 183

ORIGINAL PAPERS

- Akram M.T., Qadri R., Laquat M., Rehman N.U., Hussain T., Ali I., Jehan S., Azam M., Khan M.M., Khatana M.A., Achakzai A., Ali I.: Evaluation of different rooting stimulators and substrates to produce guava clone plants through softwood cuttings 131
- Bahadur A., Singh A.K., Yadav S., Kumar R., Krishna H., Behera T.K.: Inter-specific cucurbitaceous rootstock enhances growth and yield in grafted cucumber (*Cucumis sativus* L.) 237
- Cruz-Álvarez O., Ornelas-Paz J.J., Araujo-Pallares D.L., Frías-Moreno M.N., Ávila-Quezada G.D., Ojeda-Barrios D.L., Jacobo-Cuellar J.L.: Temporal variations in flowering of ‘Honeycrisp’ apple grafted on eight different rootstocks 211
- Delić M., Blesić M., Behmen F., Andušić A., Topčić F., Murtić S.: Effect of harvest time on total phenolic and flavonoid contents and antioxidant capacities of two grape varieties from the Trebinje vineyard area 304
- Feng L.H., Yang X.A., Wang S.W., Hao H.L., Zhang C.F., Gao Y.C., Wang Y.Q., Alifu Y., Zhao W.H.: Effect of leaf-to-fruit ratio on kernel quality formation of walnut trees 201
- Gül E.N., Polat E., Özgöz E., Geboloğlu N.: Degree of seedbed compaction and response of spinach (*Spinacia oleracea* L.) under different traffic treatments 342
- Gür E., Gündoğdu M.A., Başaran T.: Determination of the variation in volatile components during the ripening of *Sorbus domestica* L. fruit 53
- Jahanian A., Tabatabaei S.J., Najafi N., Bučková M., Rasouli F., Mlček J., Ercisli S.: Influence of phosphite and phosphate fertilisers at three different pH levels under a floating system on the growth, yield, and nutrient concentration of broccoli 120
- Kumawat K.L., Raja W.H., Mir J.I., Raina S.K.: Effect of genotype and leader type on benzyladenine induced sylleptic branching in apple nursery trees 33
- Le T.T., Nguyen P.T., Pham T.V., Nguyen T.O.: Effects of nutrient solutions on growth, yield and quality of yardlong bean plant (*Vigna unguiculata* subsp. *sesquipedalis* L.) grown in a hydroponic system 333

Li J., Qi Q., Zhang Q., Wang M., Liu Y., Sun X., Mu Y., Yang C.: Variations in bog bilberry fruit characteristics along an altitudinal gradient on Changbai Mountain, China	111
Li Z.J., Zhu Y.X., Yang X.A., Xiang Y.J., Zhang Y., Wang H.B., Wang Z., Yu S.Y., Hu Y.H.: Selection of high-quality tree peony varieties suitable for the south Yangtze River area	42
Lin W., Wei X., Li Y., Ghani M.I., Hu X.J., Chen X.Y.: Endophytic <i>Streptomyces</i> extend the vase life of <i>Gerbera jamesonii</i> L. by modulating the antioxidant system and suppressing bacterial growth	224
Ma J., Peng J., Jia N., Wang X., He Y., Wang E., Hu D., Wang Z.: Comprehensive protection of tomato photosystem under cold stress by <i>Streptomyces</i> sp. TOR3209	261
Mayerová M., Stehlík M., Šimon T., Hutla P., Gerndtová I.: Granular organic hydrosorbents increase water retention and resistance of boxwood seedlings	162
Pavani Y., Janaki P., Murali Arthanari P., Jagadeeswaran R., Sankari A., Ramalakshmi A., Bharathi C.: Sequential and combined spray of herbicides to tomato field on weed reduction, fruit parameters and carryover residues	91
Pavlović S., Girek Z., Damnjanović J., Roljević Nikolić S., Stevanović D., Ugrinović M.: The influence of LED light on the development and antioxidant status of broccoli (<i>Brassica oleracea</i> var. <i>italica</i>) microgreens	272
Sarı Ö.: Effects of application of biostimulants and growth regulators on root traits and analysis of root architecture with machine learning in <i>Lilium</i>	313
Sciampagna M.C., Mannucci A., Limpido S., Ranieri A., Castagna A., Santin M.: Knowing your enemy before taking the field: A screening of salt and UV-B treatments to boost the biochemical defenses of tomato (<i>Solanum lycopersicum</i> L., 'Moneymaker' cultivar) plantlets in controlled conditions	353
Sharma S., Kumar A., Pathania S., Sharma B.P., Kashyap B., Hashem A., Avila-Quezada G.D., Abd_Allah E.F.: Integrated effect of inorganic and bio-organic nutrients on alstroemeria growth, flowering and soil dynamics	144
Shehaj M., Shehaj E., Çekaj E., Naqa A., Krasniqi B.: European rose chafer prevalence on cultivated highbush blueberries	155
Soumiya K., Muthuvel I., Kavitha C., Chandrakumar K., Shanmugasundaram K A., Manikanda Boopathi N.: Simple and robust sex determination in papaya (<i>Carica papaya</i> L.) cultivars using SCAR markers	61
Suwor P., Mueangkhong M., Kawicha P., Thanyasiriwat T., Techawongstien S., Kumar S., Tsai W.-S., Kramchote S.: Effect of <i>Trichoderma harzianum</i> against <i>Fusarium oxysporum</i> in resistant and susceptible tomato cultivars	173
Šušnjar A., Polak T., Živković A., Lazić S., Vuković S., Mitrić S., Guljaš D., Bošković D., Ećimović J., Šunjka D.: <i>Trans</i> -polydatin and <i>trans</i> -resveratrol in grape berries grown under organic and conventional production systems	281
Těthal J., Sochor J., Sotolář R., Pavloušek P., Baroň M., Danko R., Kaplan M., Klimek K.: A study on the effects of rootstocks on the vine balance of the 'Cerason' cultivar	293

Wang X., Liang E., Li D., Song X.: Short- and long-term effects of elevated CO ₂ on the growth and nitrogen content of <i>Panax japonicus</i>	324
Wojdyła A.T., Nowak J.S., Bocianowski J., Kałużna M., Wiśniewski J., Waszkiewicz E.: Effect of compounds used for soaking narcissus bulbs on mycelium coverage of bulbs and substrate	103
Wojdyła A.T., Nowak J.S., Bocianowski J., Kowalski A., Wiśniewski J., Waszkiewicz E.: Effect of treatment of narcissus bulbs with hydrogen peroxidewith silver and fungicides on plant growth and development	81
Wu Y., Shi G., Zhou J., Tian Q., Liu J., Huang W., Xia X., Mou H., Yang X.: Identification and validation of stem rot disease resistance genes in passion fruit (<i>Passiflora edulis</i>)	67
Zanjani R.K., Abdouss M., Mohammadi M.: Investigating the effects of ethephon (2-chloroethylphosphonic acid) on Persian walnut fruit quality	250
